

fully automatic disposal

We offer the following types of big VOMAT local filtration systems.

type	max. filtration performance (l/min)
FA 480	480
FA 600	600
FA 720	720
FA 840	840
FA 960	960

fully automatic sludge treatment

- newly developed sedimentator with fully automatic recycling of reusable materials with a residual moisture of 5-10%
- user friendly disposal directly in a transport container of the recycling companies

installation and commissioning of the complete system including piping on customer request

standard model FA 480 - 960

- dimension: 2500 x 1400 x 1500 mm (l x w x h)
- filter body with a separate oil and waste oil area
- the medium is filtrated in full flow
- grade of filtration: 3 - 5 µm
- appropriate energy efficient filtration via frequency controlled system pump
- SPS control
- oil capacity for filter system ca. 2700 l
- variable oil volume ca. 1000 l
- input voltage 3 ~ 400 V + N + P

compact system
Vomat FA 480 - 960

standard model FA 960**separated oil and waste oil area**

We produce everything according to the customer requirements ranging from the standard plant to the individual complete solution,

FROM ONE SOURCE.
